Changzamtog, Thimphu, Bhutan

uchiadendup@gmail.com

As a motivated Junior Data Analyst and Explorer Full-Stack Web Developer with a passion for leveraging data-driven insights to create impactful web applications, I bring a unique blend of analytical skills and creative coding expertise. Proficient in Python, Django, and data analysis tools, I am dedicated to delivering user-focused solutions that bridge the gap between data and user experience.

## EDUCATION

**2017**

**Jampel Higher Secondary School**

Completed class 12

**2020**

**After becoming a De-suup**

- I have worked in numerous work like water project in kalapang(Dec 14th 2020 -May 10th 2021), crown control and Million fruit tree plantation at Serzong, Mongar(06.03.22-30.04.22).
- Learnt Data-Analyst using python (First Batch; 3-4 months)
- Studied Full-Stack Web-development using django framework (First Batch; 3-4months)

## WORK EXPERIENCE

**De-Suung HQ (May 1st 2022-July 31st 2023)**

- Created an interactive dashboard to view the training details from past to the present.
- Simplified one of the excel work using Jupyter notebook.
- Have some experience in handling WordPress websites.
- Explored Adobe illustrator and photoshop and designed some logo and posters for our organization.
